(54) Title: HEART ASSIST DEVICES, SYSTEMS AND METHODS

(57) Abstract: A heart assist device (10) adapted for implantation into a patient (99). The device (10) includes an aortic compression means (60) adapted, when actuated, to compress an aorta (15) of a patient (99), a fluid reservoir (74) and a pump means (71) adapted to pump a fluid from the fluid reservoir (74) to the aortic compression means (60) so as to actuate the aortic compression means (60) at least partly in counterpulsation with the patient's heart. The fluid reservoir (74) is adapted to be wholly positioned within the chest cavity of the patient (99).

INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU00/00654

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos : 61
because they relate to subject matter not required to be searched by this Authority, namely:

Plant or animal varieties. (Article 34(4)(a)(i); Rule 67)
2. ☐ Claims Nos :
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos :
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

See extra sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

PCT/AU00/00654

Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

Continuation of Box No: I

The international application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to form a single general inventive concept. In coming to this conclusion the International Searching Authority has found that there are different inventions as follows:

1. Claims 1-20, 55-60 are directed to a heart assist device adapted for implantation, comprising an aortic compression means. It is considered that a pump means, a fluid reservoir and the aortic compression means being actuated at least partly in counterpulsation with the patient's heart comprise a first "special technical feature".
2. Claims 21-35 are directed to a heart assist device adapted for implantation comprising an aortic compression means. It is considered that a pump means, a liquid reservoir and the aortic compression means adapted to be positioned in close juxtaposition with one another within the chest cavity comprise a second "special technical feature".
3. Claims 36-46 are directed to an aortic compression means for use with a heart assist device. It is considered that an elastic inflatable cuff adapted to be placed about the ascending aorta and a flexible, substantially inelastic sheath adapted to extend around the cuff and at least assist in retaining it in position on the aorta comprise a third "special technical feature".
4. Claims 47-54 are directed to a heart assist device comprising an aortic compression means. It is considered that the compression means being adapted to be placed around the ascending aorta, an actuation means to periodically actuate the aortic compression means in at least partial counterpulsation with the patient's heart, the aortic compression means and actuation means being placed wholly within the chest cavity comprise a fourth "special technical feature".

Since the abovementioned groups of claims do not share any of the technical features identified, a "technical relationship" between the inventions, as defined in PCT rule 13.2 does not exist. Accordingly the international application does not relate to one invention or to a single inventive concept.
